### DETAILED ACTION

1. This is in response to the Amendment filed 11/14/2003 which has been entered into the record of file.

#### ***Double Patenting***

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 32-38, 43-45 and 46-52 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-7, 8-10 and 14-20, respectively, of U.S. Patent No. 6,384,819. Although the conflicting claims are not identical, they are not patentably distinct from each other because the application's claims claim no further limitations in order to distinguish the scope of the patented claims, i.e., "preparing the digital image" (claim 32) and "a memory configured to store data related to the character". It should be noticed that one of ordinary skill in the art at the time the invention was made to understand that those newly added steps as indicated above are inherently included in the patent claims in order to generating/displaying a character on the display screen. Furthermore, it is important to

note that the instant application is a continuation of the application which yielded the U.S. Patent No. 6,384,819 used herein as the basis for the obviousness type of double patenting rejection. The applicant is attempting to distinguish the patent claims by claiming some inherent features in the continuation at issue here. If allowed, would improperly extend the "right to exclude" already granted in the patent.

***Allowable Subject Matter***

4. Claims 53-58 are allowed.
5. Claims 39-45 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
